

WONG JUN MENG

AI SOFTWARE ENGINEER | MACHINE LEARNING ENGINEER

+60 16-237 3933 | wjunmeng@gmail.com

[linkedin.com/in/junmengg](https://www.linkedin.com/in/junmengg)

EDUCATION

Bachelor in Data Science (Honours)

Tunku Abdul Rahman University of Management and Technology | CGPA: 3.83/4.00

Jan 2023 – Jun 2025

Foundation in Computing

Tunku Abdul Rahman University of Management and Technology | CGPA: 3.78/4.00

Sep 2021 – Jun 2022

EXPERIENCE

AI Software Engineer | SainoForce Technology Sdn Bhd, Kuala Lumpur

Jan 2026 – Present

- Led the development of a Workforce Planning and Recruitment platform, designing the overall workflow and system structure while mentoring 3 interns during implementation
- Implemented AI-assisted recruitment features that automate resume information extraction and candidate comparison, enabling HR teams to evaluate 100+ candidate profiles more efficiently
- Developed an automated recruitment management workflow that covers interview scheduling, candidate communication, and hiring progress tracking, reducing manual HR coordination workload by over 70%
- Designed an end-to-end Retrieval-Augmented Generation (RAG) pipeline covering data extraction, preprocessing, chunking, embedding generation, and Pinecone vector database ingestion, achieving 80%+ retrieval accuracy and supporting continuous model improvement through evaluation and feedback workflows

AI Software Engineer Intern | SainoForce Technology Sdn Bhd, Kuala Lumpur

Jun 2025 – Dec 2025

- Contributed to the development of an internal AI-powered HR chatbot by researching and fine-tuning Small Language Models (SLMs) with curated datasets covering 50+ company policy and legal documents to support automated HR knowledge queries
- Improved chatbot response relevance by implementing a RAG workflow that retrieves information from internal HR documentation, enabling faster access to policy information and reducing manual HR inquiry handling
- Deployed AI service APIs and configured cloud and on-premise server infrastructure to support continuous system availability, enabling reliable integration between the AI backend and the company's HR platform with 24/7 operational uptime
- Developed and launched the first version of a digital service marketplace platform for Sarawak Digital Economy Corporation (SDEC), collaborating in a 3-engineer team to deliver the production-ready system within 6 weeks

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C#, HTML, CSS

AI & Machine Learning: PyTorch, Hugging Face Transformers, RAG, NLP, Deep Learning Models, LLM Fine-tuning

Frontend: React, Next.js, Tailwind CSS, Streamlit

Backend: Node.js, FastAPI, REST API Development

Databases: Microsoft SQL Server, MySQL, PostgreSQL, ChromaDB, Prisma ORM, Firebase, Supabase

Cloud & DevOps: Runpod GPU, BytePlus GPU, Linux Servers, PM2, Git, Pinecone, Zeabur

AI APIs & Tools: OpenAI API, Claude API, DeepSeek API, Google Gemini API, Billplz

AI Developer Tools: Claude Code, OpenAI Codex

PROJECTS

HR AI Chatbot – Small Language Model (SLM) + RAG

Python, FastAPI, Hugging Face Transformers, Pinecone, RAG, Streamlit, Runpod GPU, Mac Mini

- Developed a domain-specific HR chatbot using Small Language Models (SLMs) with fine-tuning on curated datasets covering 50+ company policy and legal documents
- Implemented a Retrieval-Augmented Generation (RAG) pipeline integrating Pinecone vector database to enable hybrid search and context-aware response generation
- Designed RESTful inference APIs using FastAPI and deployed on GPU-enabled cloud servers and Mac Mini infrastructure for scalable model serving
- Built evaluation and feedback pipeline allowing HR staff to review chatbot responses and collect improvement data for future model fine-tuning

HRMS – Workforce Planning, Recruitment & Learning Management System

Python, C#, Microsoft SQL Server, FastAPI, OpenAI API, DeepSeek API, ChromaDB, Zeabur

- Developed an enterprise Human Resource Management System (HRMS) integrating workforce planning, recruitment automation, and employee learning management into a unified platform supporting multiple HR operational workflows
- Implemented AI-assisted recruitment features including resume parsing, candidate comparison, and recommendation workflows to evaluate and shortlist candidates across 100+ applicant profiles
- Built an automated recruitment workflow covering interview scheduling, email notifications, and hiring stage tracking, reducing manual HR coordination workload by over 70%
- Designed a gamified Learning Management System featuring a virtual token wallet and AI-driven course recommendations, enabling employees to participate in internal and external certification (AI CERTs) training programs

SDeMARKETPLACE – Digital Service Marketplace Platform

Demo: <https://sdemarketplace.my>

Next.js, Node.js, Prisma ORM, Microsoft SQL Server, PM2, Billplz, Linux Cloud Server

- Developed a full-stack digital service marketplace platform enabling businesses to purchase solution packages and training services online
- Implemented FAQ chatbot using embedding vector search to provide automated responses for user inquiries and platform guidance
- Integrated online payment gateway to support secure bundle, service and training course purchases on the platform
- Deployed production system on cloud server with CI-ready deployment setup, HTTPS configuration, and PM2 process management within a 3-engineer team

MWE Detection Chatbot – Deep Learning NLP

Demo: <https://fyp-mwedetection.streamlit.app>

Python, PyTorch, Hugging Face Transformers, Deep Learning Models, Streamlit, BytePlus GPU

- Developed transformer-based deep learning models to detect Multi-word Expressions (MWEs) including idioms, collocations, and compound entities
- Fine-tuned and evaluated 4+ transformer-based models on a 10k+ labeled Malaysian social media dataset, achieving strong performance across accuracy, precision, recall, and F1-score
- Built and deployed an interactive Streamlit web application for real-time MWE detection, enabling public access to the NLP model for experimentation and analysis
- Published research findings on [IEEE Xplore](#) and [Journal of Applied Data Science \(JADS\)](#), demonstrating real-world applications of MWE detection for emotion and personality traits analysis in property rental datasets

CERTIFICATIONS & LANGUAGES

- AWS Academy Graduate – Cloud Web Application Builder | Cloud Architecting | Cloud Foundations
- Anthropic – Claude Code in Action
- L'Oréal x Monash Datathon 2025
- **Languages:** English, Mandarin, Malay, Cantonese (spoken)
